

SENIS - Customer Reference:

Varian – USA, California

It was a great pleasure visiting our customer Varian in the USA, a Siemens Healthineers Company.
Thank you for the warm welcome.
It was a pleasure discussing SENIS Hall technology and its application.

We look forward to further collaboration!

Varian – USA, California

www.varian.com

Varian has long been on a mission to help create a world without fear of cancer. Now, as a Siemens Healthineers company, they are working as one, based on a more expansive perspective of the patient's journey than ever before. As a result, the vision for the future – and what can be achieved on behalf of patients – has expanded and become much more comprehensive.

“Customers like our products for two reasons; the first one is that SENIS Hall Probes can measure all three components of magnetic field with unprecedented accuracy and repeatability very close to the magnet surface and in small gaps. The second reason is that SENIS software is very user-friendly and offers different types of analysis, with different types of data visualisation.”

About SENIS AG

SENIS AG, Switzerland develops, manufactures and supplies advanced sensors and instruments for magnetic field and electric current measurement as well as the corresponding development and engineering services. Our solutions and services help our clients in the automotive, consumer electronics, test and measurement industries, as well as to research institutes to create powerful, robust and effective products.

SENIS® Magnetic Field Mapper MMS-1X-RS installed at ABB Switzerland is a high-end magnetic field scanner that can be applied for mapping of all three components of DC or AC magnetic field. It can be used at customers in the R&D and as a quality assessment tool in production lines for accurate 3D mapping of permanent magnets.
