

**Datasheet: Output Signals Cable CO20-X**  
**Accessory for the F3B analog magnetic field transducers**

**DESCRIPTION:**

Figure 1: Output Signals Cable CO20-X

**NOTES:**

- Cable shield is connected to the metal case of the connector.
- End wires of the signals cable are unterminated and thinned ( $\sim 3 - 4$  mm). On a demand, the ends can be terminated by the standard banana plugs.
- Applicable with the NEW developed F3B 3-axis magnetic field transducers since January 2023.

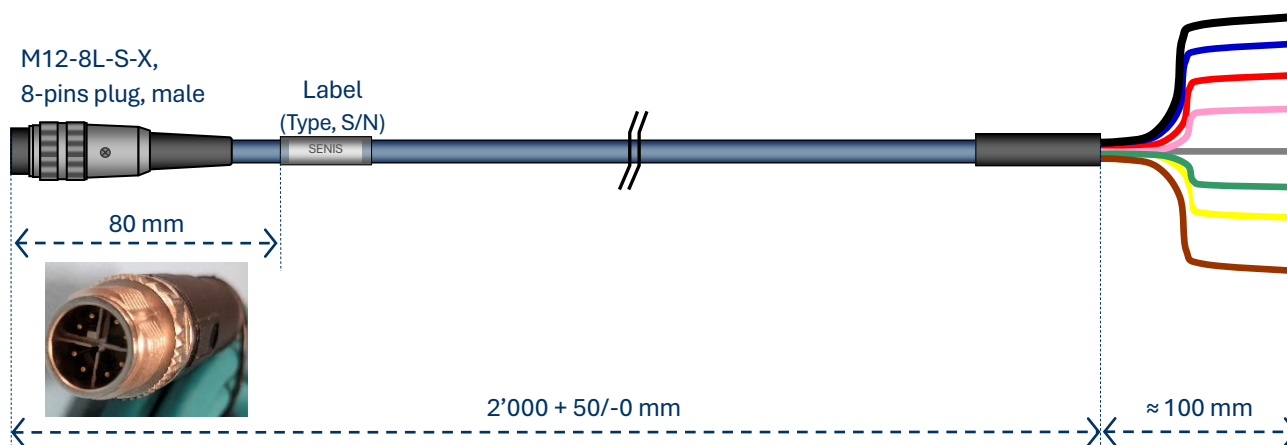

Figure 2: Dimensions and tolerances of the CO20-X signal cable

**Output signals layout:**

Cable Pair	Output signal	Cable wire color
P1	X+	brown
	X-	white
P2	Y+	blue
	Y-	white
P3	Z+	yellow
	Z-	white
P4	Temp	green
	GND	white
Cable Shield	Shield	black
